Sitness AirWork

Fit and healthy while sitting – with Sitness® Technology by Topstar.

Everyone spends over 10 hours per day in a seated position. So that's a lot of time which you simply shouldn't spend on low quality chairs – that could lead to incorrect posture and back pain.

The unique Sitness® technology in our chairs ensures a three-dimensional sitting and keeps you moving while seated. The freedom of movement in every direction guarantees more active sitting. This allows you to unconsciously train your back muscles and thus prevent back pain.

The Advantages of Sitness®?

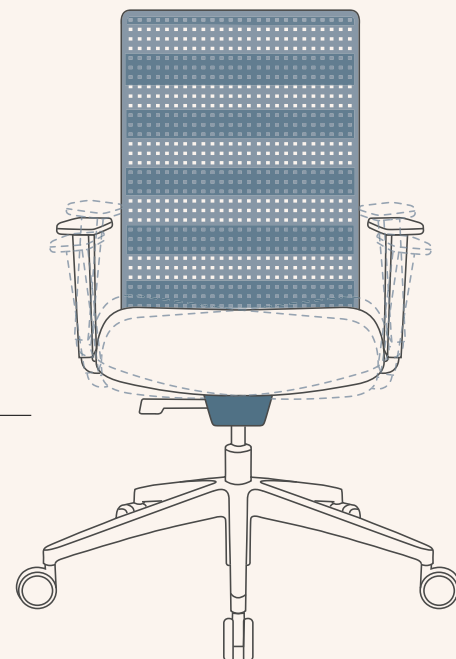

- + Exercises your back and spinal column
- + Takes pressure off the intervertebral discs
- + Guarantees freedom of movement
- + Stimulates blood circulation
- + Improves concentration
- + Increases motivation and commitment

Sitness®

Our unique Sitness® technology separates the rigid connection between the lower part of the chair and the seat and creates a dynamic connection.

Just move!

— **Sitness AirWork**

Sitness AirWork

Moving and unique

"Fit as a fiddle" - that's the promise of the new Sitness AirWork with its three-dimensionally movable seat joint for all sporty and active office sitters, whether at home or in the office - naturally AGR certified.

For its visual appearance, the choice is between a new breathable mesh fabric, which has been newly developed in the style of modern sneakers of the sporting goods industry, and an ergonomic fully upholstered backrest.

The design team of the #wagnerdesignlab has created a modern, sporty piece of work equipment that meets all current standards for the office and contract sector without sacrificing a homely interior character.

Completely Made in Germany using very few plastic components, all of which can be separated by type and recyclable.

Sitness AirWork

Awarded with the AGR seal of quality

In a world where exercise and health in the workplace are becoming increasingly important, there is exciting news: Eight of our products have been tested by the AGR and awarded with the „Tested & Recommended“ seal of approval!

But who is the AGR actually? Aktion Gesunder Rücken (AGR) e. V. is an independent organisation with the aim of promoting back health. To this end, the AGR has developed the „Tested & Recommended“ seal of approval as a decision-making aid for consumers. Only products that are categorised as „back-friendly“ are awarded with this seal. For this assessment, an independent test commission consisting of doctors and therapists from various specialisms comes together and subjects a wide variety of products to strict test criteria.

With our AGR-certified models, you can create the most important component of a healthy working environment. Our unique Sitness® technology ensures three-dimensional sitting. The freedom of movement in every direction ensures more active sitting, which unconsciously trains the back muscles and prevents back pain.

In recognition for manufacturing
back-friendly products, this certificate
is awarded to

TOPSTAR GmbH
