Sitness Urban Salzburg

Fit and healthy while sitting – with Sitness® technology from Topstar.

Everyone spends over 10 hours a day in a sitting position. That's a lot of time that should never be spent sitting on bad chairs – because this leads to poor posture and back pain.

The unique Sitness® technology in our chairs ensures three-dimensional sitting and keeps you moving even when seated. The freedom of movement in every direction ensures more active sitting, which means you unconsciously train your back muscles and prevent back pain.

The advantages of Sitness®?

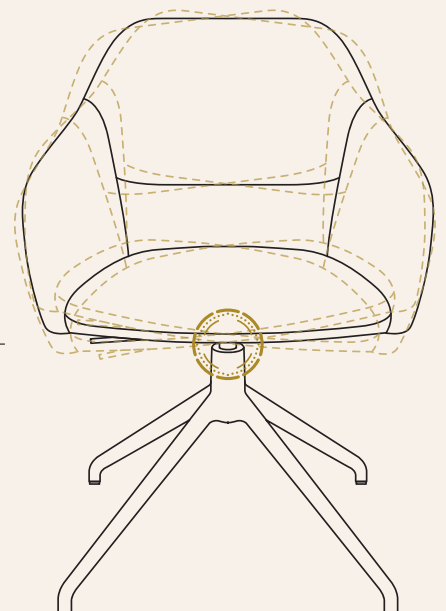

- + Exercises the back and spine
- + Relieves pressure on the intervertebral discs
- + Guarantees freedom of movement
- + Revitalizes the blood circulation
- + Improves the ability to concentrate
- + Increases motivation

Sitnness Urban Salzburg

Awarded with **AGR seal of approval**

In a world where exercise and health in the workplace are becoming increasingly important, there is exciting news: Eight of our products have been tested by the AGR and awarded the “Tested & Recommended” seal of approval!

But who is the AGR actually? Aktion Gesunder Rücken (AGR) e. V. is an independent association with the aim of promoting back health. To this end, the AGR has developed the “Tested & Recommended” seal of approval as a decision-making aid for consumers. Only products that are classified as “back-friendly” are awarded this seal. For this assessment, an independent test commission consisting of doctors and therapists from various specialist areas comes together and subjects a wide variety of products to strict test criteria.

With our AGR-certified models, you can create the most important component of a healthy working environment. Our unique Sitnness® technology ensures three-dimensional sitting. The freedom of movement in every direction ensures more active sitting, which unconsciously trains the back muscles and prevents back pain.
