E-Table

E-Table

Perfect for home office and office!

The E-Table Basic is characterized by its monolithic look, the large table surface, as well as the individual height adjustment.

In just a few seconds, the desk transforms into a standing workstation, allowing the user to switch from a sitting to a standing position to meet current ergonomic recommendations.

The adjustable telescopic legs allow the desk to be ideally adapted to any body size and the intended use.

It is also possible to save the preferred standing and sitting position using the integrated memory function.

The height-adjustable E-Table is available in four monolithic colors - black, white, grey, mint green and petrol blue.

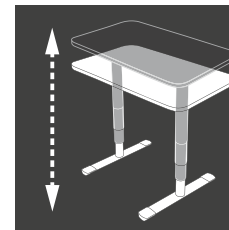

E-Table

Technical Data:

Plate length:	160 cm
